

# Ricoh App for Google Cloud Print

Seamless desktop-based print  
device management

# Open up your print devices to the cloud

The Ricoh App for Google Cloud Print enables you to securely connect users to your Ricoh printers and MFPs wherever they are working from, using Google's easy-to-use cloud printing service.

Available as a single-device installation for compatible Ricoh models, Ricoh's App provides a simple, cost-effective and user-friendly way to broaden access to your print fleet without the need to invest in complex infrastructure upgrades.

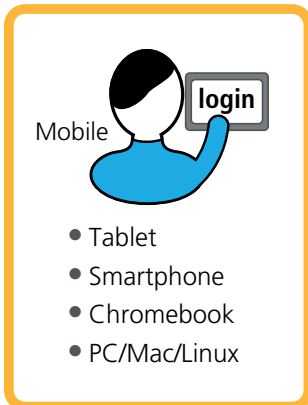

Once activated, users can securely send print tasks to your devices from any device with an internet link, including Wi-Fi as well as a mobile data connection. The Ricoh App for Google Cloud Print means there is no longer any need for users to have a fixed connection to your network or an individual printer or MFP. This also means you can bypass the need to install and maintain print drivers on employee computers, saving time and resource.

By enabling cloud printing to your fleet from a wider range of user devices, the Ricoh App for Google Cloud Print supports greater employee mobility and can underpin bring-your-own-device (BYOD) initiatives within your organisation.

## Key benefits of the Ricoh App for Google Cloud Print:

- Enables flexible printing to Ricoh devices from any location and any internet-connected device
- Supports greater workforce mobility and secure BYOD initiatives
- Provides users with access to all basic print features, including black and white / colour printing, multiple copies, page fitting options and selected page ranges
- Bypasses the need to install and maintain print drivers
- Print submissions are protected using a HTTPS connection for added security
